Example 1 Minute Movie

For 12 Seconds, no movement. Time index (00:00-00:12)

For 5 Seconds, some movement. Time index (00:13-00:17)

For 8 Seconds, lots of movement. Time index (00:18-00:26)

For 12 Seconds, lots of movement. Time index (00:27-00:39)

For 22 Seconds, very little movement. Time index (00:40-1 minute)

Current Position: HH:MM:SS of HH:MM:SS

| Rewind | Play | Pause | Stop | Forward | Speed - | 1x | Speed + | Volume | Mute | Capture Frame |

PLAYING

Current playback position, can be dragged anywhere. Should be on top of the movement detected colours.

For 16 Seconds, no audio detected. Time index (00:00-00:16)

For 9 Seconds, some audio detected. Time index (00:17-00:26)

For 14 Seconds, lots of audio detected. Time index (00:27-00:41)

For 19 Seconds, no audio detected. Time index (00:42-1 minute)

Notes:
- These are only example guides, audio and movement detectors should operate on a per second basis throughout
- File should be 'pre-processed' so this information is shown before playing etc
